

## Important to know

- Only start the activation process when you have received all the required documentation! You...
  - a) have switched to pushTAN and do not use any other TAN procedure** → Your Online Banking access remains unchanged. You will receive from us a single registration letter (Registrierungsbrief / Letter No. 1). As soon as you receive this letter, you can start the activation process.
  - b) are a new Online Banking customer or are using pushTAN in addition to another TAN procedure** → You will receive two separate letters, a registration letter (Registrierungsbrief / Letter No. 1) and one with new access data (Letter No. 2 with user name and initial PIN). Only start the activation process when you have received both letters.
- If you use an App or Banking Software for your online banking, you will have to install the pushTAN procedure there too.
- The procedure described here is just an example and may differ slightly depending on your mobile device.

1

Install the S-pushTAN App from the App Store on your mobile device.

2

Start the S-pushTAN App and allow it to access your device.

Assign a password with at least 8 characters (figures, letters and a special character).

3

Select the option "Mit Registrierungsbrief starten" (Start with registration letter). Using the App, scan the QR code in the registration letter (Letter No. 1) or enter the registration code manually.
